

Manual Testing Assessment Test

- URL :

You can refer to these **test cases while creating test cases for login page** of your application under test. As we know that the focus here is to cover the different features to be tested instead of the creation of formal test cases, so basically we will be presenting test scenarios here.

A screenshot of the Amazon "Create account" form. The form is titled "Create account" in a large, black, sans-serif font. Below the title, there are four input fields: "Your name" (with a placeholder "First and last name"), "Mobile number or email", "Password" (with a placeholder "At least 6 characters"), and "Re-enter password". Below the "Password" field, there is a small blue information icon followed by the text "Passwords must be at least 6 characters." At the bottom of the form is a yellow "Continue" button.

Above task all will be cover all mobile based, web based and responsive based)

Note: To Write Separate Testing below Task for Mobile, Web, responsive)

Task 1) to create test scenario of registration functionality in Amazon

To check only functional testing in Sheet1

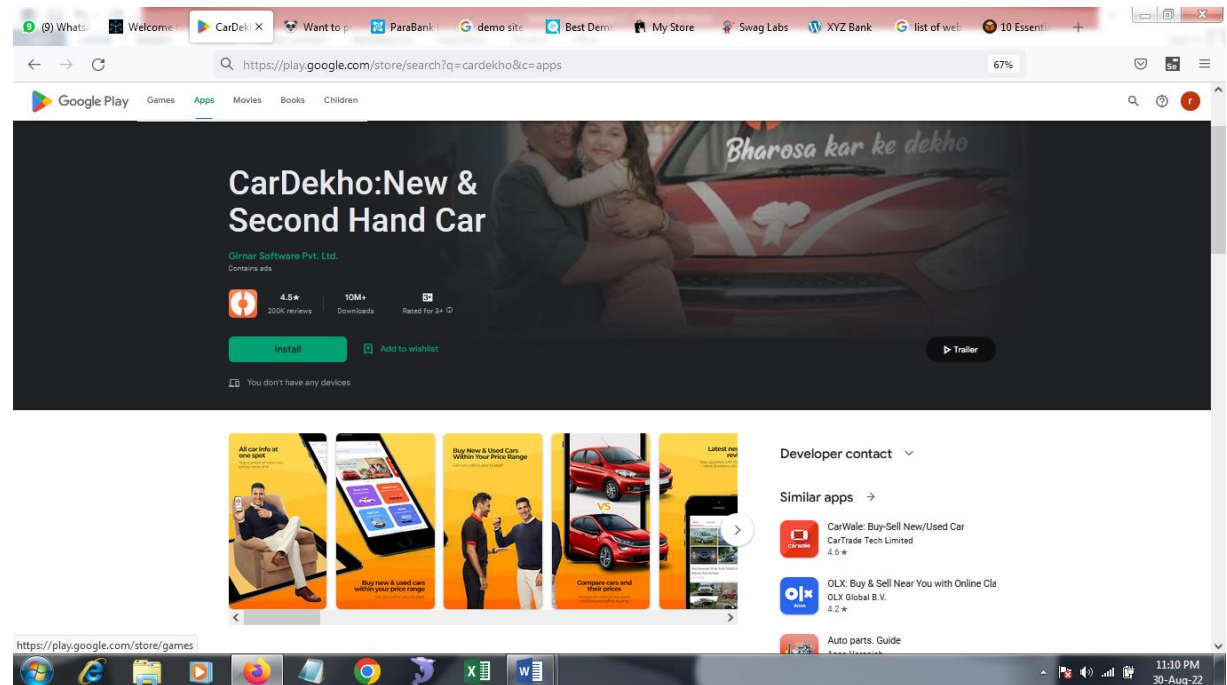

Task 2) to create test Case of Registration functionality of above Test Scenario which you created

(Note: with number of test case will create as a positive and negative) (In Sheet2)

Task 3) to create Responsive Testing and problem write on sheet with screenshot for Registration Page (in Sheet 3)

Note : To download and Install the application your mobile device , here I shared you play store link)

URL : <https://play.google.com/store/search?q=cardekho&c=apps>

Task 1) to create only Defect Report (in Sheet 4)
(Column of document for defect report: Defect ID, Defect Summary, Mobile Device/Version No, Step, TestData, Defect types, Defect Severity, Defect Priority, Screenshot/video)

- ➔ To Cover Functionality Defect
- ➔ To Cover Security Defect
- ➔ To check GUI Defect
- ➔ To check Usability Defect
- ➔ Minimum 30 + Defect find from this application
